## **Final Reminder for Candidate Writing Under the Old First Class Syllabus**

August 31, 2011 is the last date to write the First Class power engineer certification examination under the old syllabus.

Because of the significant revision to the syllabus, examination results are not transferable from the old Syllabus to the Revised Syllabus. Candidates who are unsuccessful in completing the 1<sup>st</sup> Class certification, under the old syllabus, will have to pass all papers under the Revised syllabus for certification.
