### **Reorganization of SOPEEC\* 4<sup>th</sup> Class Power Engineer Syllabus**

In support of the request of IPECC\* and industry to realign the learning process of Power Engineering Syllabus topics, ACI\* members approved the 2014 IPECC motion to reorganize the 4<sup>th</sup> Class SOPEEC Syllabus to be used across Canada at their August 26<sup>th</sup>, 2014 annual ACI meeting in Ottawa.

The revised SOPEEC 4<sup>th</sup> Class Syllabus based on the learning process with syllabus topics will be effective on November 1, 2017.

On this date the examination candidates who have not passed any of the 4<sup>th</sup> Class examinations must write their examinations based on the revised 4<sup>th</sup> Class Syllabus.

On November 1, 2020, examination candidates who fail to obtain their SOPEEC 4<sup>th</sup> Class certification based on the current 4<sup>th</sup> Class Syllabus will lose the examination that they have passed and have to start with the examinations based on the revised SOPEEC 4<sup>th</sup> Class Syllabus.

The revised 4<sup>th</sup> Class course materials are expected to be published by May 2017, six months before the revised SOPEEC 4<sup>th</sup> Class syllabus is implemented on November 1, 2017. The curriculum document based on the revised SOPEEC 4<sup>th</sup> Class syllabus is expected to be posted on the IPECC website before the end of 2014.

Please visit the ABSA website to review the revised SOPEEC 4<sup>th</sup> Class syllabus topics.
